

The PV solar tiles also provide excellent weather-tightness and wind resistance, without the need for extra roof batten support, adhesive flashing rolls or fireproofing materials. The certified wind resistance for Marley SolarTile ® is ...

The Tile Trac design allows for a low profile to the roof while still enabling water and debris to naturally shed from the roof. The support rail is lifted enough to allow proper air-flow to dry the roof under the system preventing solar system ...

If you have a concrete tile roof, there are two common ways to go about installing solar panels on a concrete tile roof. First, your installer can put S-hooks under the tile for your system to be mounted on. Your installer would temporarily remove ...
