How do I install a pole mount?

A wood block placed between the pole and conduit will make installation easier. Strapping the conduit directly to the pole works well in most cases - just remember to leave some space for the pole mount install.

How do you install a pallet pole?

Installers can safely reach the top of the pole using a ladder or a stable platform. This initial step serves as the foundation for the subsequent assembly. Using the provided manual, you can systematically remove the parts from the pallet and secure them onto the pole.

Can a solar array be installed on a freestanding pole?

In some cases, you may need to install the solar array on a freestanding pole to achieve the desired location. Once you, the installer, and the customer have determined the best spot to install the solar array, you can discuss other details such as conduit length and trenching.

How do I package the components needed for each pole?

The components needed for each pole are neatly packaged on separate pallets. This packaging method allows for easy access and transportation of the required parts. We recommend positioning the pallets within 10-20 feet of each pole, allowing you to quickly grab what you need. Once the packaging is removed, you can simply start from the top.

How long does it take to install a pole mount?

We recommend positioning the pallets within 10-20 feet of each pole, allowing you to quickly grab what you need. Once the packaging is removed, you can simply start from the top. This way, you can progress relatively quickly through the installation process. A pole mount can be assembled in a half day to full day, depending on experience.

Do I need a permit to install a pole mount?

In some jurisdictions using a pole mount can eliminate the need for some of these inspections. It is the responsibility of the installer to determine if permits or inspections are going to be required for the installation.
