

# Quote for Shelter Energy Storage Fire Fighting System

What are the ESS safety requirements for energy storage systems?

The International Fire Code (IFC) published its most robust ESS safety requirements in the most recent 2021 edition. By far the most dominant battery type installed in an energy storage system is lithium-ion, which brings with it particular fire risks.

What are the fire and building codes for energy storage systems?

However, many designers and installers, especially those new to energy storage systems, are unfamiliar with the fire and building codes pertaining to battery installations. Another code-making body is the National Fire Protection Association (NFPA). Some states adopt the NFPA 1 Fire Code rather than the IFC.

What is battery energy storage fire prevention & mitigation?

In 2019, EPRI began the Battery Energy Storage Fire Prevention and Mitigation - Phase I research project, convened a group of experts, and conducted a series of energy storage site surveys and industry workshops to identify critical research and development (R&D) needs regarding battery safety.

What happens if a power generation & energy storage facility fires?

Power generation and energy storage fires can be very costly, potentially resulting in a total write-off of the facility. Fires happen quickly and may spread fast, destroying critical company assets. Passive fire protection may lower risk but ignition sources and fuel supplies remain.

How do you protect a battery module from a fire?

The most practical protection option is usually an external, fixed firefighting system. A fixed firefighting system does not stop an already occurring thermal runaway sequence within a battery module, but it can prevent fire spread from module to module, or from pack to pack, or to adjacent combustibles within the space.

How does Fike protect lithium ion batteries and energy storage systems?

Learn how Fike protects lithium ion batteries and energy storage systems from devastating fires through the use of gas detection, water mist and chemical agents.
