

Six-position punch for photovoltaic bracket

What is a photovoltaic mounting system?

Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces like roofs, building facades, or the ground. [1] These mounting systems generally enable retrofitting of solar panels on roofs or as part of the structure of the building (called BIPV). [2]

What are mounting brackets & rails for solar panels?

Mounting Brackets are the primary components that attach the solar panels to the mounting surface. They come in various types depending on the mounting surface (roof, ground, pole, etc.). Rails: Rails are long, horizontal structures attached to the solar panels using clamps. They provide a stable base for the solar panels.

What is a solar racking mounting bracket?

Mounting brackets are heavy-duty equipment, usually made from stainless steel or aluminum. All solar racking and mounting products, whether for the rooftop or ground, must meet strict guidelines to ensure durability and structural integrity to withstand high winds and weather events.

What are the different types of solar panel mounting components?

Types of Mounting Components (Hardware) Mounting Brackets are the primary components that attach the solar panels to the mounting surface. They come in various types depending on the mounting surface (roof, ground, pole, etc.). Rails: Rails are long, horizontal structures attached to the solar panels using clamps.

How good is a rooftop solar PV array?

A rooftop solar PV array is only as good as the mounts and rails it sits upon. Below we have the latest updates from 16 manufacturers across residential and commercial & industrial solar mounting systems, and approaches vary greatly.

What are the best solar mounting and racking brands?

The top two high-quality solar mounting and racking brands are: Originally, IronRidge supported mostly small, off-grid projects. But today, IronRidge is known for its uniquely shaped and durable XR rail series for pitched roofs. They have equally great options for flat roofs and ground mounts, as well.
