

Is China a leader in the global solar PV market?

China has emerged as a leading player in the global solar PV market. According to China's National Energy Administration (NEA), the country added 54.88 GW of solar PV capacity in 2021 comprising approximately 29.28 GW of distributed generation and 25.60 GW of centralized solar PV.

Which country is responsible for 80% of solar module production?

Currently, China is responsible for 80-85% of global solar module production. The IEA's World Energy Investment 2024 report reveals that China is the only country globally that has reached the levels of clean energy investment needed in a net-zero-aligned world. Throughout 2023, it was responsible for a third of global clean energy investments.

Is Vietnam ready for a solar-powered future?

Vietnam, with its exponential solar power deployment in 2020, adds another chapter to the blueprint that other Asian countries can follow in their energy transitions. With that said, Asia's path toward a solar-powered future is clear. Now countries should follow it.

What is the solar energy potential in Kyrgyzstan?

In Kyrgyzstan, the solar PV potential is 267,000 MW (UNIDO and ICSHP, 2016). With solar insolation of 1000-1700 kW/m² (or 1500-1900 kW/m² (ESMAP, 1997)), the potential for solar energy is estimated at 490 GWh/year for thermal and 22.5 GWh/year for electric energy (Asian Development Bank, 2014; Stamaliev, 2010; Umbriel Temiraliev, 2015).

How many large-scale solar power plants are there in Kazakhstan?

According to QazaqSolarz (2019), in 2019, a number of large-scale solar power plants were put into operation, namely, "Nurgisa" 100 MW in Almaty oblast, "Zhangiz Solar" 30 MW in East Kazakhstan oblast, and "Saran" 100 MW, "Agadyr" 50 MW and "Gulyshat" 40 MW in Karaganda oblast.

Are solar photovoltaics a viable option for less-developed countries?

Many less-developed countries--in terms of the human development index, reliability of electricity supply, and access to electricity--tend to have very high practical solar photovoltaic potential, so far untapped.
