

Solar Thin Film Power Generation Company Address

How do I contact powerfilmsolar?

Email: shansen@powerfilmsolar.com Phone: 515-292-7606 Learn more about the PGA Show We design and manufacture custom solar cells, panels, and power solutions using proprietary thin-film or high-efficiency crystalline PV technology.

Who is PowerFilm?

PowerFilm designs and manufactures custom solar cells, panels, and power solutions for energy harvesting, portable, and remote power applications using proprietary thin-film or high-efficiency crystalline PV technology. We develop high-quality custom solar solutions for IoT, transportation, military, and consumer applications.

What makes Hanergy a world leader in thin-film solar technology?

In addition, Hanergy has entered into thin-film solar power plant construction agreements across the globe totaling a capacity of about 10GW. Through global technical integration and independent innovation, Hanergy has become a world leader in thin-film solar technology.

Is PowerFilm a US based solar company?

Celebrating over thirty years in business, PowerFilm is proud to be one of the few US-based solar manufacturing companies operating today. The Soltronix brand brings PowerFilm expertise, innovation, and commitment to US-based semi-flexible crystalline silicon solutions.

What makes PowerFilm unique?

PowerFilm's proprietary manufacturing provides custom amorphous silicon panels that work in any light environment, including the indoor, industrial lighting of many IoT sensor applications. Celebrating over thirty years in business, PowerFilm is proud to be one of the few US-based solar manufacturing companies operating today.

What is IoT & why should you use PowerFilm?

Devices used in IoT are often extremely low power, light energy outdoors and indoors can be used to extend or replace traditional batteries, making long-term maintenance-free solutions possible. Since PowerFilm's beginning over 30 years ago the US Department of Defense has been our largest lifetime customer.

Currently the solar power window film is still under development and not available for sale yet, but the main priorities in continuing to develop the technology appear to be power efficiency and maintaining a scalable level of affordability, so that ...
