

Solar Turbine Generator

Who makes Solar Turbines?

Solar Turbines Incorporated, a wholly owned subsidiary of Caterpillar Inc., designs and manufactures industrial gas turbines for onshore and offshore electrical power generation, for marine propulsion and for producing, processing and transporting natural gas and oil.

What is a solar powered generator?

Solar-powered generators--also called portable power stations--are a growing sector of the power market. I started using these a few years ago and was thrilled with having a clean, efficient charging system that doesn't roar or burn through gas.

What is a gas turbine generator package?

Our standard power generation packages are suitable for operations in any environment. Our gas turbine generator packages can be used in combined-cycle systems or in combined heat and power plants, where the turbine exhaust heat can be recovered for processes requiring thermal energy.

What is a solar generator & how does it work?

Solar generators convert sunlight into energy to power your devices and appliances when you don't have electricity, making them a perfect item to bring with you on a camping trip, or as a home backup system for running small appliances during a power outage.

Who is Solar Turbines?

Solar Turbines is one of the world's leading manufacturers of industrial gas turbines, with more than 16,000 installed in 100 countries with service available for every unit. How can we help you meet your energy needs? Get in Touch

What can a solar powered generator charge?

These generators can charge power tools in the shop, laptops for remote work, and personal devices like bluetooth headphones and speakers. A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage.
