

Solar bracket pigeon raising

How do I pigeon-proof my solar panels?

Solar panels provide a warm dry spot that is out of the way of predators - perfect for pigeons to nest under. Pigeons can cause damage to your solar panels as well as be a noisy nuisance. Below are 8 methods you can use to pigeon-proof your solar panels: 1. Hire a Pigeon Control Company

How to prevent pigeons from acquiring solar panels?

When choosing materials for DIY pigeon-proofing, it's vital to consider the size of the birds that need to be discouraged. Options such as bird mesh, spikes, netting, and electric bird repellents are effective in stopping birds from acquiring solar panels.

Why do pigeons like solar panels?

One of the main reasons pigeons are drawn to solar panels is because they provide a safe and elevated place for nesting. Pigeons naturally seek out secure locations as nesting sites to protect their eggs and young from predators. The raised surface of solar panels offers an ideal spot, as it provides shelter and protection from the elements.

Do pigeons nest on solar panels?

Pigeons are notorious for perching and nesting on solar panels, causing damage and reducing their efficiency. But fear not! In this article, I'll break down the cost of pigeon proofing your solar panels, so you can enjoy the benefits of clean energy without the hassle of bird-related problems. Why

How much do pigeon proofing solar panels cost?

The cost of pigeon proofing solar panels differs depending on the size of the solar panel installations, the chosen method, and the complexity of its installation. On average, homeowners in the UK can expect to invest between £400 to £1200 for proper services of pigeon proofing solar panels.

Can pigeons live under solar panels?

Birds attract other visitors to your solar panels. Squirrels, bats, rats, mice, and insects--they'll all move in to join the birds. These critters will chew through your wiring and tear up the place faster than you can say, "Bird B Gone." You simply cannot afford to allow pigeons to live under your solar panels. The costs are just too great. 1.
