

Solar generator home use price quote

Is a whole house solar generator worth it?

It depends on your needs. If you just want to backup a few appliances, power the lights, and recharge your phone and other gadgets, then a whole house solar generator is worth it. It's FAR less expensive than setting up a home solar system with roof mounted panels, a battery bank, miles of wiring and so on.

How much does a solar generator cost?

Good examples include the 6kWh Goal Zero Yeti 6000X, the 4.8kWh Renogy Lycan 5000, and the 5.1kWh BLUETTI EP500. Expect to pay \$5,000-\$8,000 depending on accessories, grid-tie equipment, and solar panel choices. Pre-configured solar generators that can store more than 6kWh of energy are expensive and relatively new.

Are solar-powered generators a good idea?

With all the environmental issues the world continues to face, going solar is becoming a must. And solar-powered generators are just one of many new kinds of solar technology that can help cut emissions and costs. They are a lifesaver for portable power- whether that's for an off-road adventure or to reduce your reliance on the grid.

Can a rechargeable solar generator power a house?

Generally speaking, a rechargeable solar generator won't be able to power your entire house if you lose power. With that said, even a smaller generator can be used to power key devices or appliances, sometimes for days at a time depending on its power consumption.

Should you buy a solar generator or a power station?

Ideally, you want a solar generator that juices up your electronics quickly, but you also want a power station that can be charged up fairly quickly. This usually isn't something you have to worry about with modern power stations from top brands like Jackery or EcoFlow. With solar generators, the tightest bottleneck is the solar panels themselves.

How much does a home backup solar generator cost?

A home backup solar generator capable of powering most appliances, keeping your LED lights on, and keeping your electronics charged and running will cost between \$2,000 and \$10,000 depending on capacity, power rating, and included accessories. Let's look at how these choices will impact how much you'll spend.
