

Solar panels generate electricity with wind turbines

According to many renewable energy experts, a small "hybrid" electric system that combines home wind electric and home solar electric (photovoltaic or PV) technologies offers several advantages over either single system. In much of ...

A wind turbine's generator turns kinetic energy into electricity, and it doesn't respond to an equilibrium in the same way a solar panel does. As long as the wind blows and the turbine is engaged, it will continue to generate power.
