

Solar photovoltaic panel crystal flower

What is a smartflower Solar Flower?

The Smartflower solar flower is an all-in-one ground-mounted solar system with a tracker that follows the sun. However, it doesn't look like the solar panels you might be used to. Learn all about the product, how it compares to other solar options, and whether you should consider one for your home in our Smartflower solar review.

Are smartflower solar panels expensive?

Most of Smartflower's beautiful and unique sun-tracking solar sculptures aren't purchased by homeowners. Cost is a big reason. Smartflower solar panels unfurl in the morning and track the sun across the sky. In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product.

How do smartflower solar panels work?

The tracking system is powered by a small built-in motor, which makes the movement of the smartflower panels smooth and silent. With its advanced technology and efficient design, smartflower solar panels are able to produce up to 40% more energy in comparison to solar panels.

Does a smartflower produce more electricity than a solar panel?

Thanks to this tracking capability, the Smartflower can produce significantly more electricity than a similarly-sized rooftop solar panel system - up to 40 percent more, according to Smartflower's website.

What is the future of smartflower solar panels?

Whether it's a small household or a large business, smartflower panels offer a sustainable and cost-effective solution for generating clean energy. The future of smartflower solar panels looks bright. As the demand for clean and sustainable energy continues to grow, these panels are poised to become a key player in the renewable energy sector.

How big is a smartflower solar panel system?

Rooftop solar panel systems may need to be customized to account for several variables like roof type and space availability, but with the ground-mounted SmartFlower module, you have the freedom to install the system wherever there is sufficient exposure to sunlight. The unit itself is 194 square feet.
