

# Solar photovoltaic power station depreciation

Can a solar power plant be depreciated?

Consequently, this enables users to realize tax benefits based on the depreciated value of the asset during the given year. A solar power plant that has been operational for more than 180 days within a fiscal year is eligible for a 40 +20% depreciation. The asset owner may thus write off 60% of depreciation in the first year.

What are the benefits of solar energy depreciation?

It allows businesses to recoup the costs associated with an asset as its value naturally diminishes throughout its operational lifespan. However, for homeowners considering a transition to solar energy, the advantages of solar energy depreciation predominantly cater to businesses.

How accelerated depreciation benefits are available for solar power plants?

Specifically, the Indian government provides accelerated depreciation benefits for fixed assets in solar power plants, permitting companies to declare a depreciation rate of up to 40% within a single year. This rate is notably higher compared to the standard 15% depreciation rate applied to general plant and machinery.

Does TCJA allow depreciation of solar panels?

TCJA allows for 100% depreciation of solar panels and systems in the first year of service of a commercial solar system versus over five years. TCJA temporarily allows 100% expensing for business property acquired and placed in service after September 27, 2017 and before January 1, 2023.

Does the production tax credit affect the depreciable basis of solar panels?

Unlike the Investment Tax Credit (ITC), which reduces the depreciable basis, the Production Tax Credit (PTC) does not impact the depreciable basis for solar panels. The PTC is an alternative incentive that pays a set amount per kilowatt-hour of electricity generated from renewable sources over a ten-year span.
