Is solar energy worth the investment?

Solar energy itself is cost-effective. Systems produce free energy with limited maintenance for their lifespan, which averages 30 to 35 years. However, many people have to decide if solar is worth the investment.

Could solar power be the future of energy?

A 2021 study by the National Renewable Energy Laboratory (NREL) projected that 40% of all power generation in the U.S. could come from solar by 2035. Solar's current trends and forecasts look promising, with photovoltaic (PV) installations playing a major role in solving energy problems like carbon pollution and energy dependence.
