

Do solar photovoltaic projects improve poverty alleviation?

There lacks a comprehensive analysis on the large-scale deployment of solar photovoltaic projects and its impact on poverty alleviation. Here the authors show that solar photovoltaic poverty alleviation pilot policy increases per-capita disposable income in a county by approximately 7%-8%.

What are China's photovoltaic poverty alleviation projects?

China's photovoltaic poverty alleviation projects (PPAPs) aim to help alleviate poverty by using the new energy power generation. In recent years, the PPAPs have flourished with the strong support of the Chinese government, becoming an integral strategy for the support of rural industries.

Does national policy regulation support photovoltaic poverty alleviation?

Although the benchmark feed-in tariff for photovoltaic power decreases continuously, and power grid parity for renewable energy is inevitable, national policy regulation and controls still provide preferential support for photovoltaic poverty alleviation (Yang et al., 2019).

Are photovoltaic power stations a good option for poverty alleviation projects?

At present, the per unit benchmark prices for a photovoltaic poverty alleviation power station (0.50 MW and below) and the per unit subsidy for household distributed photovoltaic poverty alleviation projects remain unchanged, conferring on these projects a great advantage.

Can solar energy help alleviate poverty?

At present, poverty alleviation is an important global issue, and any country with relatively abundant solar energy resources can implement photovoltaic poverty alleviation projects.

What is the work scheme on photovoltaic poverty alleviation project?

In 2014, the National Energy Administration and the State Council Poverty Relief Development Leading Group Office jointly issued The Work Scheme on Carrying out Photovoltaic Poverty Alleviation Project, dedicated to launching a nationwide PV poverty alleviation pilot project.

Solar power generation poverty alleviation policy
