

# Solar power plant boiler manufacturers

What is a solar powered boiler?

A solar powered boiler, specifically the SolarGen® Series by Victory Energy, is a boiler that harnesses the clean, renewable, and radiant energy of the sun to produce superheated steam at typical utility pressures and temperatures. Victory Energy introduced the first industrial/utility natural circulating solar powered boiler with this new technology.

What is a solar steam boiler?

Solar steam boiler provides uninterrupted and always- dispatchable energy at an affordable cost. Solar thermal boilers mean that industrial customers are no longer dependant on fossil fuels. Solar energy is green and produces zero CO2 emissions.

What is solar thermal boiler?

Solar thermal boiler represents a significant cost reduction in any industrial scale production. In comparison to fossil-fuel based boilers, manufacturers are saving up to 75% in their boiler systems. Solar steam boiler provides uninterrupted and always- dispatchable energy at an affordable cost.

What is a SolarGen boiler?

The SolarGen® Series boiler, introduced by Victory Energy, is a new industrial/utility natural circulating boiler that harnesses the clean, renewable, and radiant energy of the sun to produce superheated steam at typical utility pressures and temperatures.

What is a photovoltaic hybrid boiler?

The photovoltaic hybrid boiler is the better electric boiler. It replaces every "normal" electric boiler. The heat is primarily generated by photovoltaic modules. If the sun doesn't shine, the hybrid boiler can automatically reheat with 1,500W via 230V mains power. The boiler is available in sizes 30L and 80L.

Where are CSP boilers used?

Since then, our boilers have been used in some of the most efficient CSP power plants around the world. These include thermal oil and molten salt parabolic trough plants, and direct steam and molten salt tower plants. We have delivered several steam producing equipment in Spain, India, China and the Middle East and North Africa region.

Victory Energy introduced the first industrial/utility natural circulating SolarGen® Series boiler. This new technology harnesses the clean, renewable and radiant energy of the sun to produce superheated steam at typical utility pressures ...
