

Specifications and dimensions of special tape for photovoltaic panels

What type of tape do you use for solar panels?

Supplied in rolls or spools of tape and custom cut to specified widths. Also available in custom die cut parts for easy assembly. Very high bond tapesaves time and money when building and mounting PV solar modules. Tape eliminates the need for spacers and sealant mixtures,as well as additional labor and drying time.

Can you use high bond tape on solar panels?

High bond tape is an ideal solution for affixing solar panelsinto frames,as well as mounting finished modules. For example,you can use our high bond tape to attach solar panels to brackets on buildings,roofs,RVs and anywhere solar power will be used. Supplied in rolls or spools of tape and custom cut to specified widths.

What are photovoltaic tapes used for?

Photovoltaic tapes for the renewable energy market for bonding,venting,insulation,protection &masking. Custom rolls &die-cut shapes available.

Are 3mtm solar acrylic foam tapes reliable insulators?

3M's Solar Acrylic Foam Tapes have passed IEC,UL,and TÜV testing. They perform as reliable insulatorswhen used in conjunction with buses/foils in thin film solar panels. These tapes consist of a polymeric film with acrylic adhesive on one or both sides.

What type of adhesive is used for solar panels?

Made with double sided,industrial strength adhesive or our custom hybrid system. High tack adhesive filmprotects photovoltaic module glass,aluminum,and various metals from damages. Use our residue-free film tape during shipping,handling,and production line processes. PROTEK(TM) film solar tape also resists UV and outdoor aging up to 6 months.

What is a 3M dielectric tape?

3M's 3MTM Dielectric Tapesperform as reliable insulators when used in conjunction with buses/foils in thin film solar panels. They consist of a polymeric film with acrylic adhesive on one or both sides. These tapes can be applied at high speeds using automation equipment,resulting in high productivity during panel manufacturing.

High bond tape is an ideal solution for affixing solar panels into frames, as well as mounting finished modules. For example, you can use our high bond tape to attach solar panels to brackets on buildings, roofs, RVs and anywhere solar ...
