

Sunshine Solar Power Generation Series

What is the Sunshine Series?

The Sunshine Series is made up of extra tough solar roof tiles with integrated photovoltaic cells, compatible with normal roof shingles, easy to install.

What is a 'sunshine/No Sunshine' threshold?

The threshold for 'sunshine/no sunshine' is defined by the World Meteorological Organization (WMO 2008) as the 'the duration of the period for which the direct solar irradiance exceeds 120 W/m^2 '; yet, for the C-S recorder, the threshold necessary to produce a burn averages 170 Wm^{-2} , with a range from 106 to 285 Wm^{-2} (Painter 1981).

Why did MITI start the Sunshine Project?

Director of the Photovoltaic Technology Research Association 11-1. The Sunshine Project was planned prior to the oil crisis in 1973. At the beginning of 1970, discussions on alternative energy were started in the MITI to respond to concerns about the unstable energy supply at that time. In the wake of

Our 160W solar panel is the most powerful of the Sunshine Solar range for 12V battery charging if you are looking for faster power generation this solar module will deliver. The high wattage output combined with high efficiency crystalline ...
