

# TBEA photovoltaic support equipment

What does TBEA do?

TBEA has developed into a leading enterprise in the world power transmission and transformation industry, China's new polysilicon material development and large-scale aluminum electronics export base, large-scale solar photovoltaic and wind power system integrators, multiple manufacturing industrial parks in China, and two bases overseas.

What products are made by TBEA?

Products manufactured by TBEA are used in many elements of the project, including multi-port power routers used in key equipment for the AC-DC hybrid microgrid, PV inverters and a full range of SVG products that are capable of effectively improving microgrid quality.

What is a TBEA 1500 V string inverter?

TBEA has developed a new 1,500 V string inverter with a maximum efficiency of 99.02%, maximum power point tracking (MPPT), a maximum input current of 65 A, and a maximum short circuit current of 115 A.

Why is TBEA SunOasis introducing LCOE solutions for ground-mounted photovoltaic power plants?

As the application scenarios of photovoltaic products are getting more diversified and complex, TBEA Sunoasis has been continuously optimizing its product portfolio and introduced better LCOE solutions for ground-mounted photovoltaic power plants.

What technology does TBEA new energy use?

TBEA New Energy uses TS208KTL-HV high-power string inverters as the core support, and uses AI, 5G, big data, cloud computing and other technologies to achieve dual-end data fusion from the cloud to the station, providing the equipment layer and pipeline.

Who is TBEA new energy?

The inverter business of TBEA New Energy has spread to more than 20 countries including India, Pakistan, Saudi Arabia, and Vietnam, and its cumulative shipments have exceeded 30GW. Inverter products have also gradually expanded from the earliest centralized inverters to current high-power cascade inverters.
