

Taiwanese media talks about space solar power stations

Why did Taiwan re-establish communications & electrical power within 24 hours?

The Taiwan team informed the Allied Space Nations team that Taiwan needed to re-establish communications and electrical power within 24 hours, hoping to prompt quicker action from the U.S. Convinced of China's culpability, the Taiwan team did not investigate the attacks further or seek concrete evidence for attribution.

Why is Taiwan going big on solar and offshore wind power?

That's a big reason why Taiwan's government is going big on solar and offshore wind power. It expects renewable energy generation to more than double from 9.5 percent of Taiwan's power mix last year to 20 percent in 2026. Chris Philpot A visitor to Taiwan quickly senses why this shield is needed.

Could a space war game be a stopgap for Taiwan?

As a stopgap, Taiwan contracted with OneWeb for satellite internet and communication services. Two years ago, to find out, the Nonproliferation Policy Education Center proposed conducting a space war game that focused on a near-term Taiwan-China scenario.

What percentage of Taiwan's energy will come from renewables?

The company aims for 60 percent of its energy to come from renewables by 2030, and 100 percent by 2040. That's a big reason why Taiwan's government is going big on solar and offshore wind power. It expects renewable energy generation to more than double from 9.5 percent of Taiwan's power mix last year to 20 percent in 2026. Chris Philpot

Could a giant solar power station be built in Europe?

And last November, science ministers in the E.U. greenlit Solaris, a joint project between the European Space Agency (ESA) and aerospace company Airbus to look into the possibility of building gigantic solar power stations in geostationary orbit over Europe.

Is green energy coming to Taiwan?

"There is a strong will at the highest levels of government to bring green energy to Taiwan. However, at the local level it's still quite challenging," says Leo Seewald, chairman of the Taipei-based solar developer New Green Power. The challenges are forcing developers to get more creative.
