

The cost of installing solar panels to generate electricity

How much does a solar system cost?

Leasing a system is cheaper upfront, but you won't get the federal tax credit. The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024.

How much does it cost to install solar panels?

After solar incentives, the general range is \$10,000 to \$30,000 for an average American household to invest in solar panels. This includes the cost of the panels themselves, installation and any additional equipment needed. It typically takes five to 15 years to break even on solar installation costs.

How much does a 5 kilowatt solar system cost?

The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

How much do solar panels cost per watt?

The average cost per watt for solar panels in the U.S. is \$2.84 for residential systems. High-efficiency monocrystalline panels tend to be at the higher end of the price range, but they generate more power with fewer panels--ideal if you have limited roof space.

Can solar panels save money on energy costs?

Yes, homeowners across the US can save money on energy costs by powering their homes with solar panels instead of purchasing electricity from a utility. This is especially true following the rapid rise in grid electricity rates in 2022 and 2023.

How much does a 5000 watt solar system cost?

A fully installed solar system typically costs \$3 to \$5 per watt before incentives like the 30% tax credit are applied. Using this measurement, 5,000 Watt solar system (5 kW) would have a gross cost between \$15,00 and \$25,000. The price per watt for larger and relatively straightforward projects are often within the \$3-\$4 range.
