

The harm of inferior solar panels

Are solar panels harming the environment?

If we thought that solar panels would cause active harm to the environment, we wouldn't have them on our own roofs." The authors found that these concerns about PV end-of-life materials and toxicity are slowing down decarbonization at a critical juncture in the energy transition.

Are solar panels a problem?

The vast quantity of waste from all of those sources is a concern and we need to find ways to reduce waste, but solar panels are not a major issue in that larger conversation. Solar panels do not contain harmful levels of the toxic materials that often get discussed at public hearings about development.
