

Villa area solar power generation scene

Where is Villanueva Solar power plant located?

Located in the Viesca region of Coahuila, Mexico, Villanueva is a 754MW solar photovoltaic (PV) power plant being developed by Enel Green Power Mexico (EGPM), a subsidiary of Enel. The Villanueva solar project will be the biggest solar photovoltaic power project in the Americas, upon commencing operations in 2018. Image courtesy of Enel S.p.A.

What is Villanueva Solar?

Villanueva is a 754MW solar power project being developed in Viesca, Coahuila, Mexico. Image courtesy of Enel S.p.A. Enel is investing approximately \$650m in the Villanueva solar PV project. Image courtesy of Enel S.p.A.

How many MW of Villanueva power plant is online?

Approximately 310MW of the power plant's capacity came online by December 2017, including 190MW from Villanueva 3 and 120MW from Villanueva 1. EGP is using advanced construction technologies at Villanueva to make it a digital construction site.

How does street layout affect solar energy harvesting?

Thus, the street layout affects building shape and building orientation, and as such it plays a significant part in solar energy harvesting, leading also to an impact on building energy and environmental performance [16].

What is the solar bytes pavilion?

The Solar Bytes pavilion, designed by assistant professor at Kent State University Brian Peters, is a temporary structure which highlights the potential of new techniques available to architecture: robotic arms, 3D printing, smart technologies such as lighting sensors, and solar energy.

What is EGP doing at Villanueva?

EGP is using advanced construction technologies at Villanueva to make it a digital construction site. It is implementing full digitisation and automation processes during both the planning and execution phases of construction. The project demonstrates the benefits of automation and digitisation in increasing productivity.
