

Waterproof requirements for photovoltaic support steel

Flashing is the process of using roof-compatible, waterproof materials to keep water from penetrating a roof system at penetrations, joints, horizontal-to-vertical intersections and so forth. Generally speaking, effective flashing requires ...

Ground photovoltaic support: The concrete strip is used as the base form, and the support is installed on the ground by means of foundation, direct burial, etc. (1) The structure is simplified and can be installed quickly. (2) The adjustment ...
