

Waterproofing methods for photovoltaic panel joints

Our Approach to Roof Waterproofing. Most flat roofs in Singapore are constructed from reinforced concrete and feature a waterproofing membrane that is insulated by slab panels with bituminous joints. Over time, these joints may crack and ...

Flashing is the process of using roof-compatible, waterproof materials to keep water from penetrating a roof system at penetrations, joints, horizontal-to-vertical intersections and so forth. Generally speaking, effective flashing requires ...

Installing solar roof attachments requires drilling dozens of holes through roofing material, making any roof vulnerable to water intrusion. Given this reality, it's important to understand how water intrusion (and the resulting ...
