

# What are the basic materials of photovoltaic panels

Solar Photovoltaic Cell Basics. When light shines on a photovoltaic (PV) cell - also called a solar cell - that light may be reflected, absorbed, or pass right through the cell. The PV cell is composed of semiconductor material; the ...

Solar Cell Definition: A solar cell (also known as a photovoltaic cell) is an electrical device that transforms light energy directly into electrical energy using the photovoltaic effect. Working Principle: The working of solar ...

Both m-c and p-c cells are widely used in PV panels and in PV systems today. FIGURE 3 A PV cell with (a) a mono-crystalline (m-c) and (b) poly-crystalline (p-c) structure. Photovoltaic (PV) Cell Components. The basic structure of a PV cell ...
