

# What color is best for solar panels

The best color roof for solar panels is a light color like white or pale blue. Darker colors absorb more heat, which can decrease the efficiency of the solar panels. In addition, lighter colors reflect more sunlight, which can also help increase the ...

3 &#0183; The best angle for solar panels in the UK is about 40 degrees from horizontal. This varies slightly around the country, but not by much. A 2019 study from York University found that the optimum angle in Yorkshire is 39 degrees, ...

If you're looking for energy efficiency, it's best to stick with black or dark blue solar panels. But if you want your home to stand out from others nearby or you want a conversation starter, color solar panels might be the best option for your home.
