

What photovoltaic panels does Trina Solar use

What types of solar panels does Trina Solar offer?

Trina Solar offers two types of monocrystalline residential solar panels: the DE06X.05 (II) and the DD06M.05 modules. Both of the PV modules use half-cut cells and come with either a white or black backsheet, enhancing their visual appeal. Half-cut solar panels are more efficient than their traditional counterparts.

Who is Trina Solar?

Trina Solar is an innovative solar panel manufacturer that continuously advances its technology. The company prioritizes affordability and performance, resulting in reliable solar panels built with advanced technology. For its residential solutions, Trina Solar uses monocrystalline solar cells with multi-busbar, PERC, and bifacial technologies.

How much power does a Trina Solar panel have?

It can reach a power of 450W and has an efficiency of 22.5%, which is as good as some of the top solar panels out there. To get this much power from a smaller panel, Trina used their newest tech, called N-Type TOPCon cell technology (or PACO for short), along with high-density cells and multiple busbars.

What bifacial cell technology does Trina Solar use?

Trina Solar has been at the forefront of bifacial cell technology and the new DuoMax Twin panels use a combination of PERC, half-cut, MBB, bifacial cells housed in a dual-glass panel. Bifacial panels perform best mounted on single-axis tracking systems mounted over light coloured surfaces such as sand or even snow.

Is Trina Solar better than SunPower?

Overall, Trina Solar offers above-average solar panels at a below-average price. While they may not be as efficient as SunPower, they're not too far behind. Looking at the table above, Trina Solar's Vertex S+ panel is 1.2% less efficient but about 20% cheaper per watt than its SunPower counterpart.

Which Trina Solar panels are best for small rooftop systems?

Available with both monocrystalline and multicrystalline cells, the Trina Honey solar panel with 120 half-cut cells is perfect for small rooftop systems. All panels in the Honey Series come with Trina's 12-year product and 25-linear power output warranty.
