

# What to do if the photovoltaic panels turn red in the afternoon

How do I know if my solar lights are damaged?

To inspect your solar lights for damage, follow these steps: Check the solar panel. Look for any cracks, chips, or scratches on the solar panel. Make sure that the solar panel is not bent or warped. Check the wiring. Look for any loose wires or frayed insulation. Make sure that all of the connections are tight and secure. Check the sensor.

How do I know if my solar panel is bad?

Solar panel fault-finding guide including examples and how to inspect and troubleshoot poorly performing solar systems. Common issues include solar cells shaded by dirt, leaves or mould. Check all isolators are all on, and the circuit breakers have not tripped off. Check the grid voltage on the inverter display or app for over-voltage issues.

How do I know if my solar system is working?

Check the solar system performance data on the app and website, if available. Check the solar panels for dirt, leaves, mould, or shade issues. Check the solar inverter for any warnings or faults. Check that the isolators are all on and that the circuit breakers have not tripped off.

What should I do if I don't have solar system monitoring?

If you do not have solar system monitoring installed, the first step is to check for any obvious issues with the solar panels, such as a build-up of dirt, dust, mould, or leaves. Maybe a good wash with a soft broom and water is all that they need. Also, check no nearby trees have grown significantly and are shading the panels.

How do I know if my solar system is leaking?

Unfortunately, it is very difficult to detect an earth leakage without specialised equipment, and often, even a trained solar professional can have trouble diagnosing an earth fault. Check the solar system performance data on the app and website, if available. Check the solar panels for dirt, leaves, mould, or shade issues.

How to clean solar panels?

Regularly cleaning the panels can help to improve their efficiency and extend their lifespan. The best way to clean solar panels is with a soft brush and a mild soap and water solution. Avoid using abrasive cleaners or scrubbers, as these can scratch the panels and damage the anti-reflective coating.

You may have a circuit breaker that has tripped out in the distribution board/fusebox. Check the distribution board/fusebox and if there is a tripped circuit, carefully try to reset this. Secondly, if there is no circuit breaker ...

If your solar light is blinking on and off, there are a few things you can do to try to fix the problem. In this

## What to do if the photovoltaic panels turn red in the afternoon

article, I will discuss the most common causes of solar light flickering and provide troubleshooting tips to help you get ...

The first step to diagnosing any problem with your solar system is to complete a hard reset. This is usually done if the inverter (AKA the brain of your system) is showing a red or yellow light. Read below for step-by-step instructions on how ...
