

# White scratches on the surface of photovoltaic panels

Some visible defects in PV modules are bubbles, delamination, yellowing, browning, bending, breakage, burning, oxidization, scratches; broken or cracked cells, corrosion, discoloring, anti-reflection and misaligning (see Fig. 1).

And as always, if your panels are hard to reach or the cleaning task seems too daunting, hiring a professional solar panel cleaning service is your best bet. They will have the right tools, cleaning solutions, and safety equipment to do the job ...
