

# Wild Mountain Villa Solar Generator

Can you run a house on a solar generator?

You can run a house on a solar generator, but it needs enough power. It also depends on how long you plan to power the house because if it is a backup vs. the primary power source, that will impact the type of solar system you need.

Should I get a solar generator for my RV or rig?

If you are getting a solar generator as a backup for your home versus one to take with you in your RV or rig, it is also important to factor in portability. Some larger generators come with wheels to make them easy to move around a garage or home, but smaller ones can easily be lifted and carried when out camping.

Is Bluetti a good solar generator?

Otherwise, very few complaints. For home backup, Bluetti's AC200MAX is a powerful solar generator that allows you to stay off-grid while keeping appliances running. The 2,048 watt-hours battery capacity and 2,200-watt power output can handle everything from a refrigerator to keeping travel trailer lights on.

Is a solar generator a good choice?

LEARN MORE Summary Lightweight and easily portable, this is an excellent choice for weekenders with enough power to keep everything charged and to run small appliances. Solar generators have become increasingly popular for various activities, but especially for avid campers and full-time travelers.
