

Will the roof leak when it rains if photovoltaic panels are installed

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

Do solar panels cause roofs to leak?

Solar panels rarely cause roof leaks. When roof leaks occur after solar panel installation, they usually become evident within the first year.

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.

Can solar panels be installed on a shingle roof?

Solar panels can be installed on shingle roofs, but some shingle materials may not be as compatible and may require additional consideration during installation. If the roof is not ideal for solar panels, poor installation tactics are more likely to make it leak.

Do roofers know how to install solar panels?

Roofers don't usually have the expertise to measure, drill and install solar panels since their license doesn't allow them to operate in this capacity. They often hire subcontractors to do the actual solar work through either a licensed electrician or solar installer.
