

Wind power generation industry ranking

Which country produces the most wind power?

Key findings from the data include: China continues to dominate wind power generation with 466.5 MWh, followed by the United States at 341.4 MWh, and Germany at 132.1 MWh.

Which countries produce the most wind energy in 2022?

In the context of regional growth, the Middle East, Latin America, South East Asia, and Africa saw their combined contributions to wind power generation increase from 8% to a promising 10% in 2022. China, the global leader in wind energy generation, produced a staggering 466.5 MWh in 2022, accounting for over 40% of the world's wind energy.

Which countries have the best wind power markets?

Emerging wind power markets, such as Brazil, India, and Mexico, hold their own against traditional markets, ranking in the top 13 globally. This signifies a positive shift towards renewable energy in these rapidly developing economies.

Is the wind industry entering a new era of accelerated growth?

The report finds the wind industry is entering a new era of accelerated growth driven by increased political ambition, manifested in the historic COP28 adoption of a target to triple renewable energy by 2030. Looking forward, the report makes it clear that there is plenty to do to deliver on the increased ambition.

How much wind power is installed in 2022?

Globally, 77.6 GW of new wind power capacity was connected to power grids in 2022, bringing total installed wind capacity to 906 GW, a growth of 9% compared with 2021. The world's top five markets for new installations in 2022 were: Altogether, they made up 71% of global installations last year, collectively 3.7% lower than 2021.

Which countries are driving wind power expansion?

China continues to be the driving force behind wind power expansion, accounting for nearly 66% of global capacity additions last year. Major wind farms in regions like Inner Mongolia and Xinjiang rank among the largest in the world.
