

# Xundian Photovoltaic Panel Project Bidding Announcement

Will PV power systems grow in 2022?

According to the International Energy Agency's PV Power Systems Program (2022) (Abdullah-Al-Mahbub et al.,2023),the global installed PV capacity will exceed 942 GW by the end of 2021,and continuous price reductions in the battery storage area will result in a growing marketfor distributed PV power systems (J&#228;ger-Waldau,2022).

Will the central government offer subsidies for new PV projects?

According to a notice issued by the NEA (National Development and Reform Commission,2021,National Development and Reform Commission,2022),for new PV projects,the central government will not offer subsidiesand will implement grid parity.

How much does a PV project cost in Heilongjiang province?

Data sources In this study,we selected a PV pilot county in Heilongjiang Province as the research object. The construction period of the project is six months,with exploration and design costs of \$203.358 thousand and construction and installation costs of \$4931.438 thousand.

Does China have a distributed PV system?

With the decline of system cost and the incentive of the whole-county promotion policy of DPVG,the installed application scale of distributed PV has increased in all provinces and cities in China. According to the NEA of China,by the end of 2022,China's distributed PVcovers a relatively wide area as shown in Fig. 1.

How much does the bipartisan infrastructure law help improve PV sustainability?

Improving PV Sustainability DOE announced the selection of four research and development projects to receive \$16 million,including \$8 millionfrom the Bipartisan Infrastructure Law,aimed at reducing the costs and impacts of solar energy technologies.

Why is distributed photovoltaic generation important?

Distributed photovoltaic generation is an important measure to address climate change and boost rural revitalization. In the context of new energy grid parity,driving rooftop distributed photovoltaics to participate in the green power trading market is an inevitable necessity for energy and market development.
